

The **JACKSON** home plan by Simplicity

At 1609 square feet, the Jackson is a well designed single-story plan popular with those who want to maximize every inch of living space. The home's alley-accessed garage creates charming street appeal. An expansive living room and the large dining room adjoin a kitchen featuring ample cupboard space and an ever-useful island. The private main suite boasts a large dual vanity bathroom with a spacious closet, while the other two sizeable bedrooms—one of which can be converted into an optional den—share the second bathroom. There are plenty of reasons to simply love this well planned home.
