

The **ASPEN** home plan by Simplicity

The Aspen packs much personality into an unassuming 600 square feet. The entry feels warm and welcoming with high-quality materials from head to toe. The highly functional kitchen with generous counter space and cupboard storage overlooks the open dining and living room. The private bedroom is light and bright with a generous closet, and the bathroom has a full tub-shower. It has a separate laundry room with additional storage possibilities and an optional second bedroom in place of the living room. Comfort, beauty, and efficiency come together in this smart small home plan, perfect for those who choose to live more simply.
